

Ra Chemicals

An ISO 9001-2015 Certified Company

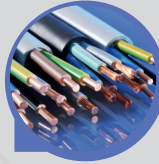

MANUFACTURING
RELATIONSHIPS,
DISTRIBUTING QUALITY

PLASTICS & POLYMERS
RUBBER
PAINTS & COATINGS

STABICON™ LS302, LS306, LS321, LS328
UPVC Pipes & other rigid extrusion applications.

STABICON™ 307, 309, 325
General purpose - PVC wire and cable compounds

STABICON™ CD
UPVC Electrical conduit pipes & other rigid extrusion applications.

STABICON™ CL, PB
UPVC column & casing pipes & Plumbing pipes

STABICON™ DSTDP
Highly effective to improve long-term thermal stability in a wide range of resins, adhesives, plastics, and lubricants.

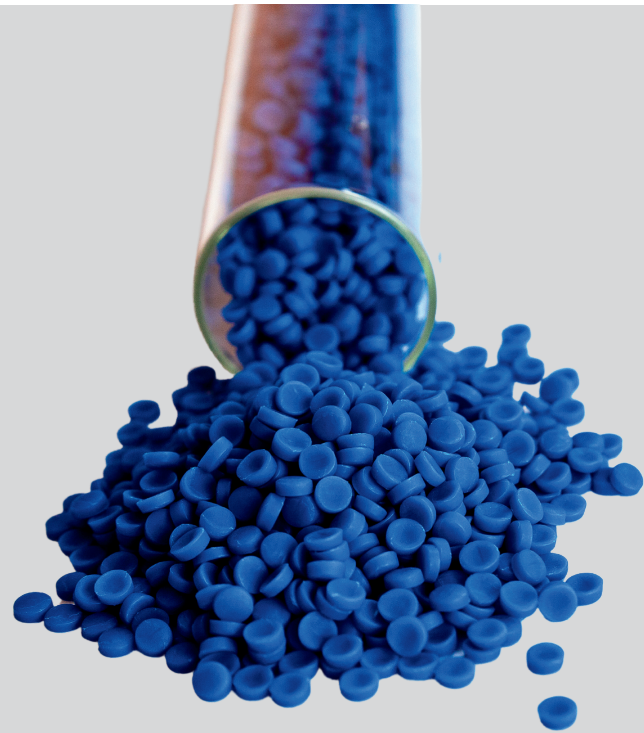

STABICON™ PERFORMANCE ADDITIVES

is very highly effective LEAD & CALCIUM - ZINC stabilizer for UPVC pipes & profiles. It gives very good initial color and high heat stability. It can also be used for other rigid applications like profiles etc.

STABICON™-2
ST-2 Stabicon Opacity Pigment™ from STABICON™ brand is a high performance white pigment for use in the paints and coating industry.

- **STABICON™ ST-15** is
- unique Inorganic pigments with unique gloss texture, non-reactive, Extention upto 50% in Plastics, Powder Coating, Industrial Paints, Coil Coatings and Ceramics.

STABICON™-24

ST-24 is unique STABICON™ Opacity Pigment™ powder for use in plastic applications. ST-24 is designed to give optimal optical properties enabling replacement of up to 100% replacement of Tio in plastics

CL - 90

CL - 24

KL - 9

CL - 50

CHINA CLAY

is a specialty hydrous kaolin designed to offer good dispersion and improved gloss in both aqueous and solvent based coatings and Inks.

Hydrous kaolin acts like spacer or helps to disperse prime pigment like TiO_2 and enhance optical and scattering efficiency with Micro-Homogeneity of the paint.

ZS MAP

PRO - AID

PRO-AID is a Zinc Stearate manufactured by a novel process developed by our R & D department having tremendous experience in precipitation and particle size/morphology control technology. The output is a unique combination of lightness and melt transparency/stability in the product and better dispersion in the base polymer.

LANSIL

is a versatile Precipitated Silica with various applications across different industries, such as Rubber Industries, Tire Manufacturing, Paints & Coatings, Adhesives and Sealants, Agriculture, and Personal Care Products.

LANSIL 1507

LANSIL 0908

LANSIL 2509

CALCINED KAOLIN

have been universally used in water base paints because of their excellent balance of properties.

During calcination, morphological, mineralogical and chemical changes occur which result in products with excellent optical properties.

RAMIN

Coated Calcium carbonate & can be used for a variety of purposes, including industrial ones. But, its largest application is in paints, coating, plastic, and paper. The reason calcium carbonate is so widely used across many industries is for its ability to reduce costs and provide boosted mechanical properties, we offer Egypt Vietnam Jordan Mines Materials.

MICA

 has excellent flexural and bridging characteristics, which contribute to crack resistance in coating applications.

ZINCOMAX™ is useful in large proportions, as zinc-oxide active, it behaves like reinforcing filler.

It gives vulcanizate high tensile strength and rebound resilience with a simultaneous increase in hardness

ZINCOMAX™

LANGUARD™ is a halogen-free FR system, having finer particle size and improved compound performance. And this product is especially designed for PVC wire and cable applications..

LANGUARD™

RA - 2060

H - AR TALC

RA - 9430

TALC

Its Product with High Whiteness The mineral is a unique 100% natural amalgamate mineral derived from high whiteness pure platy talc deposits, available in different particle size.

RA VISION

To be our customers' first choice Manufacturer for Supply of Engineered Minerals, PVC Stabilizer, Additives , Specialty Chemicals to various Industrial Segments.

RA MISSION

To Meet Customer expectations by supplying on-time, high quality products and services, with competitive pricing and consistent value.

ABOUT RA CHEMICALS PVT.LTD.

Connecting Chemistry to Success Manufacturing Relationships. Distributing Quality.

We are fastest-growing Manufacturing company based in India Which Integrates World's best Manufacturing practices in the local and International Markets. We provide customers with Best products from Across the world. Hence "Connecting Chemistry to Success"

Ra Chemicals provide a one-stop window solution for our customers by providing the right product, the right Quality and Timely Delivery. Our company enjoy a legacy of combined experience of more than 100 + Years in Marketing, Sourcing, Distributing, and Innovative Logistics, which gives us a Top notch above all.

We have Registered and Corporate office in Ahmedabad. And have multiple manufacturing site in Gujarat (Sanand GIDC, Dantali GIDC and Vapi GIDC). We also have Distribution Chanel partners PAN-India, Middle East Region, East & West Africa and searching partner in other regions.

Being part of KATHIT INC and under leadership of Mr. Mithil Amit Pathak (IIMA Alumini & Polymer Technologist) we are targeting to being most Relaiable & Preferred supplier in Industry.
